

Michael is a Ph.D. Candidate in the School of Mining and Petroleum Engineering, Department of Civil & Environmental Engineering at the University of Alberta. He is currently researching methods to inject geologic information into stochastic subsurface models. Michael has worked on several geostatistical studies in collaboration with the local resource industry. Prior to commencing his Ph.D., Michael completed a B.Sc. in Mining Engineering (With Distinction) at the University of Alberta. Michael has coauthored a chapter in a book, and published 2 peer-reviewed technical papers, 3 papers in conference proceedings and many internal papers for the Center of Computational Geostatistics.
